GENERAL CATALOGUE 2024 - 2025

FOCUSED SINCE 1827 peronda

peronda

En Peronda, comprendemos la importancia de mantener la determinación en tiempos de cambio constante. Nos encontramos en un mundo saturado de distracciones y continuas demandas de atención. Estamos rodeados de estímulos que compiten por nuestra concentración: notificaciones en nuestros dispositivos, redes sociales, noticias interminables y un sinfín de preocupaciones personales y profesionales. En medio de este torbellino de información y distracciones, mantener un enfoque claro y centrado puede parecer un desafío monumental.

Sin embargo, en Peronda, nos mantenemos arraigados en nuestros valores fundamentales y en la búsqueda constante de la calidad y la innovación. Continuamos enfocados en hacer lo mejor que sabemos hacer: crear productos excepcionales con integridad y pasión por el detalle.

En un entorno donde la atención es un recurso cada vez más preciado, la capacidad de mantener un enfoque claro y constante se convierte en un activo invaluable para nosotros. Esta filosofía es la que nos ha permitido seguir aquí desde 1827 y siempre sin perder el foco.

At Peronda, we understand the importance of staying focused in times of constant change. We find ourselves in a world saturated with distractions and constant demands for attention. We are surrounded by stimuli that compete for our concentration: notifications on our devices, social media, endless news, and a myriad of personal and professional concerns. Amid this whirlwind of information and distractions, maintaining a clear, focused approach can seem like a monumental challenge.

However, at Peronda, we remain rooted in our core values and constant pursuit of quality and innovation. We remain focused on doing what we do best: creating exceptional products with integrity and a passion for detail.

In an environment where attention is an increasingly precious resource, the ability to maintain a clear and constant focus becomes an invaluable asset to us. It is this philosophy that has allowed us to continue to be here since 1827 and always without losing focus.

Sostenibilidad
Sustainability

POLÍTICA MEDIOAMBIENTAL

PERONDA GROUP S.A. ha asumido el compromiso de establecer, implantar y mantener un sistema de gestión de la calidad de sus actividades basado en la Norma UNE-EN ISO 14001.

En línea con la filosofía medioambiental de la organización, el principal objetivo de este sistema de gestión es el respeto y la protección del medio ambiente, basado en los siguientes principios:

- Compromiso de cumplir con los requisitos legales y los requisitos aplicables.
- Compromiso con la protección del medioambiente, incluida la reducción y/o prevención de la contaminación: uso responsable de las materias primas, recursos, gestión de los residuos generados, minimización de las emisiones.
- Fomentar los procesos innovadores y eficientes, con el objetivo de reducir los impactos ambientales asociados, la contaminación de la atmósfera, las emisiones de CO_2 y los residuos generados.
- Compromiso para aumentar la flexibilidad de los procesos de producción y mejorar la productividad mediante el aumento de la calidad de nuestros productos y la eficiencia de nuestros procesos.
- Compromiso con la formación y sensibilización del personal: proporcionar formación y sensibilización ambiental continuada a todos los empleados de la empresa con el fin de aumentar y mejorar su competencia profesional, su adaptación a los nuevos cambios y procesos innovadores y generar una actitud positiva hacia la la sostenibilidad.
- Contribución a la economía circular mediante la reutilización de los recursos (aguas residuales, tiesto crudo y tiesto cocido) reduciendo la explotación de los recursos naturales.

La dirección de PERONDA GROUP, S.A. se compromete a transmitir y hacer cumplir la política ambiental en todos los niveles de la organización y en todas las etapas del proceso de producción.

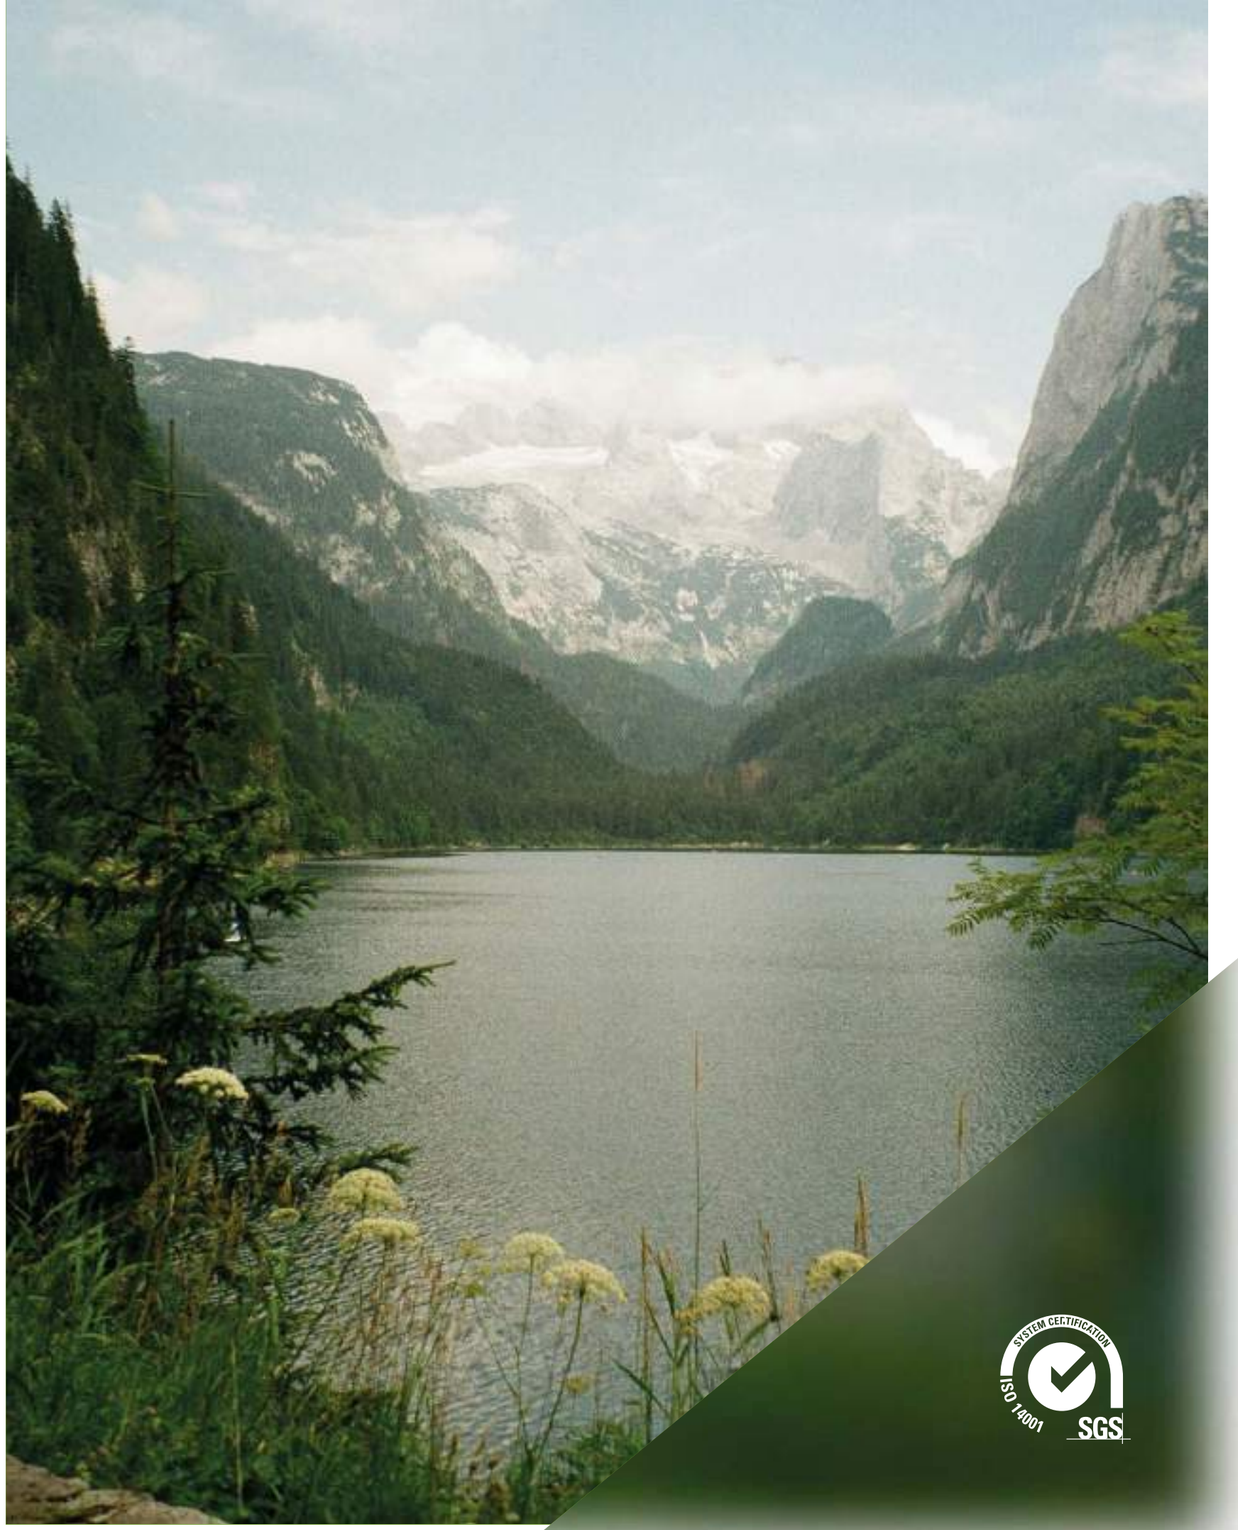

ENVIRONMENTAL POLICY

PERONDA GROUP S.A. has committed itself to establishing, implementing and maintaining a quality management system for its activities, based on the UNE-EN ISO 14001 standard.

In keeping with the company's environmental philosophy, the main aim of this management system is to care for and protect the environment, based on the following principles:

- *To comply with legal requirements and any other applicable ones.*
- *Commitment to environmental protection, including the reduction and/or prevention of pollution: responsible use of raw materials and resources, waste management, and minimization of emissions.*
- *To promote innovative efficient processes in order to reduce associated environmental impacts, atmospheric pollution, CO_2 emissions and generated waste.*
- *To boost the flexibility of production processes and to improve productivity by raising the quality of Peronda's products and the efficiency of its processes.*
- *Commitment to Training and Raising Awareness Among Staff: Provide ongoing environmental training and awareness to all company employees to enhance and improve their professional competence, adapt to new changes and innovative processes, and foster a positive attitude towards sustainability.*
- *Contribution to the circular economy through the reuse of resources (wastewater, raw pots, and fired pots), reducing the exploitation of natural resources.*

The Management of PERONDA GROUP, S.A. undertakes to make the company's environmental policy known and to ensure compliance with it at all levels of its different organizations and in all stages of the production process.

COMPROMISO REAL MEDIO AMBIENTAL

La ecología no es una moda. Ser respetuosos con el medio ambiente es algo que llevamos haciendo desde hace casi dos siglos. Somos conscientes de nuestra responsabilidad como fabricantes y, por tanto, trabajamos continuamente para minimizar nuestro impacto en el entorno.

No solo somos capaces de producir las piezas cerámicas más innovadoras, sino que nuestro orgullo es poder decir que lo hacemos desde una óptica atemporal de respeto hacia todos aquellos que heredarán nuestro planeta. Por eso, hemos llevado a cabo diferentes actuaciones buscando construir una sociedad más sostenible.

REAL ENVIRONMENTAL COMMITMENT

Ecology is not a passing trend. Environmental care has been an intrinsic part of our philosophy for almost two centuries. We are aware of our responsibility as manufacturers. That's why we strive at all times to minimize our impact on the environment.

Not only are we capable of producing amazingly innovative tiles. We are also proud to say that we do it in a forward-looking way by caring for the planet so that future generations can enjoy it.

Therefore, we have undertaken various actions aimed at building a more sustainable society.

VIDA ÚTIL

Las baldosas cerámicas son uno de los materiales de la construcción de mayor vida útil, lo que reduce de este modo el volumen de residuos generados.

La vida útil de una baldosa cerámica se estima en 50 años, por lo que se consigue que el impacto ambiental asociado a cada una de ellas sea bajo. La larga vida útil que presentan se traduce en una disminución de los residuos sólidos de demolición generados. Además, y debido a que son inertes, no requieren de consumos energéticos para su correcto funcionamiento cuando está instalada en cualquier edificio, lo que disminuye aún más los impactos medioambientales asociados.

SERVICE LIFE

Ceramic tiles are one of the building materials with the longest service life, thus reducing the amount of waste that is generated.

Ceramic tiles have an estimated service life of 50 years, and so each tile has a low environmental impact. This long service life leads to a decrease in generated solid waste or debris from demolitions. Moreover, because ceramic tiles are inert products, they require no energy consumption once they have been laid in buildings, further minimizing the associated environmental impacts.

EFICIENCIA ENERGÉTICA

- Optimización de todas las etapas del proceso productivo, lo que se traduce en una optimización de la energía consumida y en un aumento de la eficiencia.
- Instalación de recuperadores de calor y quemadores de alta eficiencia para disminuir el consumo térmico y las emisiones de CO_2.
- Instalación de luminarias tipo LED que han permitido un ahorro energético de hasta 250.000 kWh/año en consumo de energía eléctrica.
- Protocolos de detección de fugas de calor para reducir y/o eliminar las pérdidas y, con ello, reducir el consumo de energía térmica.
- Reducción de las emisiones de CO_2 debido a la conducción de carretillas elevadoras 100% eléctricas en toda la cadena de producción.
- Instalación de 15.000 m^2 de placas fotovoltaicas que permiten reducir la emisión de 637 toneladas de CO_2 debido al consumo de energías renovables.
- Aplicación de las medidas de eficiencia energética derivadas de la auditoría energética.

ENERGY EFFICIENCY

- The optimization of all stages of the production process, leading to optimized energy consumption and increased efficiency.

- Installation of high efficiency heat recovery systems in order to diminish thermal demand and CO_2 emission.

- Installation of LED lamps which represents a saving of electric energy consumption of 250.000 kWh a year.

- Heat leak detection protocols to reduce and/or eliminate losses and thereby reduce thermal energy consumption.

- Reduction of CO_2 emission by driving 100% electric forklifts during the whole production line.

- Installation of 15,000 m^2 of photovoltaic panels that allow for the reduction of 637 tons of CO_2 emissions due to the consumption of renewable energies.

- Implementation of energy efficiency measures derived from the energy audit.

EMISIONES ATMOSFÉRICAS

Minimización de la emisión de partículas a la atmósfera mediante el funcionamiento en continuo de sistemas de depuración de aire, como los filtros de mangas, para la reducción de las emisiones de partículas (que se recuperan y se reutilizan en la fabricación de atomizado) y la mejora de la calidad del aire.

ATMOSPHERIC EMISSIONS

Minimization of particle emissions into the atmosphere through the continuous operation of air purification systems such as bag filters to reduce particle emissions (which are recovered and reused in the production of atomized material) and improvement of air quality.

GESTIÓN DE RESIDUOS

- El 100% de los residuos de arcilla antes de ser cocida y de las aguas industriales son reintroducidos en el proceso de fabricación de polvo atomizado.
- Gestión integrada de los envases de cartón con SIG-ECOEMBES.

WASTE MANAGEMENT

100% of the waste clay before firing and industrial waters are reintroduced into the atomized powder manufacturing process.

- Integrated management of cardboard packaging with SIG-ECOEMBES.

ECODISEÑO

- Uso de plástico para el embalaje de los pallets con un contenido en material reciclado de hasta el 50%.
- Utilización de una tecnología limpia basada en el uso de tintas en base agua para la decoración digital de las baldosas cerámicas, evitando la generación de residuos de disolvente y haciendo el proceso de decoración digital más sostenible.
- Todos nuestros productos son envasados en embalajes de cartón 100% reciclados. Anualmente ponemos al mercado un total de más de 600.000 Kg. de cartón reciclado.
- Reducción en un 95% del consumo de plástico debido a la sustitución de embalajes de plástico por embalajes de cartón reciclado en la paquetería comercial.
-Búsqueda de nuevos sistemas de colocación (NMD) basado en la reutilización que contribuye a la reducción de las materias primas vírgenes y a las emisiones de efecto invernadero asociadas a su producción.

ECO-DESIGN

- Use of plastic for pallet packaging with a recycled material content of up to 50%.

- Utilization of clean technology based on the use of water-based inks for the digital decoration of ceramic tiles, avoiding the generation of solvent waste and making the digital decoration process more sustainable.

- All our products are packaged in 100% recycled cardboard packaging. Annually, we introduce over 600,000 kg of recycled cardboard to the market.

- 95% reduction in plastic consumption due to the replacement of plastic packaging with recycled cardboard packaging in commercial parcel delivery.

- Exploration of new placement systems (NMD) based on reuse, contributing to the reduction of virgin raw materials and greenhouse gas emissions associated with their production.

EDIFICACIÓN SOSTENIBLE

Nuestras baldosas contribuyen a la construcción sostenible gracias a:
- Emisión cero de COV's (compuestos orgánicos volátiles).
- Facilidad de limpieza.
- Alta reflexión solar, disminuyendo el efecto "isla de calor".
- Durabilidad y reciclabilidad.
- Impacto positivo en la eficiencia energética.
- Declaración Ambiental de Producto (DAP).

SUSTAINABLE BUILDING

Our tiles contribute to sustainable construction through:
- Zero emission of VOCs (volatile organic compounds).
- Ease of cleaning.
- High solar reflectance, reducing the 'heat island' effect.
- Durability and recyclability.
- Positive impact on energy efficiency.
- Environmental Product Declaration (EPD)."

CERTIFICACIONES

Certificaciones de sistemas y procesos.
Contamos con las certificaciones:
- ISO 14001: Gestión ambiental.
- ISO 9001: Gestión de calidad.

Certificaciones de productos
Nuestros productos cuentan con certificaciones como:
- GlobalEPD
- ISO 14021

CERTIFICATIONS

Certifications for systems and processes.
We have the following certifications:
- ISO 14001: Environmental Management.
- ISO 9001: Quality Management.

Product certifications.
Our products are certified by:
- GlobalEPD
- ISO 14021

ECONOMÍA CIRCULAR

CIRCULAR ECONOMY

Todos los productos de la marca PERONDA están fabricados siguiendo este modelo de producción basado en la ECONOMÍA CIRCULAR. Esta metodología de fabricación está en línea con la filosofía sostenible seguida por la empresa en todas sus actividades basada en la minimización del consumo de recursos naturales y desechos generados y priorizando el uso de materiales reciclados con el fin de minimizar el impacto ambiental.

Todas las referencias fabricadas en PERONDA contienen como mínimo un 20% de material reciclado certificado mediante la norma ISO 14021, logrando obtener productos más sostenibles y respetuosos con el medio que nos rodea.

El proceso de fabricación desarrollado en la empresa contribuye a un modelo de producción y consumo sostenibles, reduciendo la generación de residuos e incrementando la reutilización, recuperación y reciclaje de los materiales en base a:

- Reutilización del 100% de restos de polvo atomizado, tiesto crudo y residuos de polvo y partículas procedentes de los filtros de aspiración. Aproximadamente 5.000.000 Kg son reutilizados como materia prima en el proceso de fabricación de atomizado.

- Los residuos de material cocido y partículas de polvo de las rectificadoras en seco son reutilizados en diferentes procesos, como material de relleno y como materia prima reciclada en el proceso de fabricación de atomizado.

- Reutilización del 100% de las aguas residuales procedentes del proceso productivo, lo que se traduce en vertido cero: más de 14.000.000 litros de agua anuales reciclados.

All products under the PERONDA brand are manufactured following this circular economy production model. This manufacturing methodology aligns with the sustainable philosophy pursued by the company in all its activities, aiming to minimize the consumption of natural resources and waste generated while prioritizing the use of recycled materials to minimize environmental impact.

All references manufactured by PERONDA contain a minimum of 20% certified recycled material according to ISO 14021, achieving more sustainable products that are respectful of the surrounding environment.

The manufacturing process developed by the company contributes to a model of sustainable production and consumption, reducing waste generation and increasing the reuse, recovery, and recycling of materials based on:

- Reuse of 100% of atomized powder remnants, raw pot, and waste powder and particles from suction filters. Approximately 5,000,000 kg are reused as raw material in the atomized manufacturing process.

- The waste from fired material and dust particles from the dry grinding machines are reused in different processes, such as filler material and as recycled raw material in the atomization manufacturing process.

- Reuse of 100% of wastewater from the production process, resulting in zero discharge: over 14,000,000 liters of water recycled annually.

COMPROMISO ÉTICO Y SOCIAL

ETHICAL AND SOCIAL COMMITMENT

La organización cuenta con una política de igualdad, manual de conducta del empleado/a y código ético, como documentos que definen nuestro comportamiento social. Nuestros valores y pautas de comportamiento son:

- Establecer y desarrollar políticas que integran la igualdad de trato y oportunidades entre mujeres y hombres, sin discriminación de sexo, raza o religión.

- Ambiente de trabajo igualitario.

- Proporcionar la formación necesaria para contribuir al desarrollo profesional de los trabajadores/as. Anualmente se definen los programas de formación de los empleados.

- Compromiso de la empresa contra el trabajo infantil.

The organization has a policy of equality, an employee code of conduct, and an ethical code as documents that define our social behavior. Our values and behavioral guidelines include:

- Establishing and developing policies that integrate equal treatment and opportunities between women and men, without discrimination based on gender, race, or religion.

- Providing an equal working environment.

- Provide the necessary training to contribute to the professional development of the employees. Annually, the training programs for employees are defined.

- Company commitment against child labor.

CERTIFICADOS CALIDAD

QUALITY CERTIFICATES

Sistema de gestión de la calidad basado en la norma internacional ISO 9001. Certifica la mejora continua de todos los procesos, productos y servicios de la organización con el objetivo de aumentar la satisfacción de todas nuestras partes interesadas.

Quality management system in compliance with ISO 9001 norm. Certifies a continuous improvement of processes, products and services, the objective of which is the complete satisfaction of all our involved parties.

Declara la conformidad de nuestros productos con los requisitos establecidos en el Marcado CE que establece que un producto es evaluado antes de ser introducido en el mercado y que cumple con los requisitos de seguridad, salud y protección medioambiental aplicables.

This declares that our products comply with the stipulations of the CE marking, under which a product must be assessed before it is put on sale and comply with the applicable health, safety and environmental requirements.

El Certificado CCC es un sistema de certificación obligatorio para las exportaciones a China que garantiza que los productos con baja absorción de agua (E<0.5%) cumplen con los requisitos de seguridad y calidad establecidos.

The CCC certificate is compulsory for products exported to China. It guarantees that products with a low water absorption rate (E<0.5%) comply with the safety and quality requirements.

Es una certificación de aprobación de productos, emitido por el Instituto Francés CSTB, y verifica la idoneidad técnica de productos de primera calidad en relación al tipo de uso destinados.

This is a product approval certificate, issued by the French Institute CSTB, who verifies the technical suitability of top quality products in relation to the type of use intended.

La Saudi Quality Mark (SQM) es una marca de calidad regulada por SASO (Organización Saudita de Estándares, Metrología y Calidad) para poder realizar exportaciones al país.

The Saudi Quality Mark (SQM) is a quality mark regulated by SASO (Saudi Standards, Metrology, and Quality Organization) in order to conduct exports to the country.

CERTIFICADOS MEDIO AMBIENTE

ENVIRONMENT CERTIFICATES

Sistema de gestión medioambiental basado en la norma internacional ISO 14001. Sistema que certifica el cumplimiento de todos los requisitos legales de aplicación y garantiza la minimización de los impactos ambientales asociados a los procesos de la organización en línea con nuestro compromiso de sostenibilidad.

Environment management system in compliance with the UNE-EN ISO 14001 standard. Certifying system for application requirements which guarantee minimization of environmental impact, according to our commitment to sustainability.

Es una Declaración Ambiental de Producto de conformidad con la Norma UNE-EN ISO 14025, que proporciona información medioambiental basada en el ciclo de vida de nuestros productos.

An Environmental Product Declaration in compliance with the UNE-EN ISO 14025 standard, which provides environmental info based on the lifecycle of our products.

Sistema de certificación de edificios sostenibles desarrollado por U.S. Green Building Council®. Nuestros productospueden contribuir a obtener puntos para la certificación LEED.

A sustainable building certification system developed by U.S. Green Building Council®. Our products can contribute to obtain points for LEED certification.

Sistema de certificación de edificios sostenibles desarrollado por Building Research Establishment. Nuestros productospueden contribuir a obtener puntos para la certificación BREEAM®.

A sustainable building certification system developed by Building Research Establishment. Our products can contribute to obtain points for BREEAM® certification.

Etiqueta medioambiental para el mercado francés que informa sobre el contenido en COV's (Compuestos Orgánicos Volátiles). Declara que nuestros productos son de tipo A+, contribuyendo a un hábitat sano y respetuoso con el medioambiente.

An environmental label for the French market, which provides information on the VOC content (volatile organic compounds). It declares that our products are rated A+, contributing to a healthy environmentally-friendly habitat.

Nomad system

NMD SYSTEM

Time to renew.

+ NOMAD es la solución revolucionaria de construcción en seco de Peronda, que usa un innovador sistema de sujeción magnética: Simple, funcional, ecológico.
+ NOMAD aplica un recubrimiento ferromagnético a la cerámica. La instalación de las piezas se realiza sobre superficies capaces de generar adhesión magnética permanente e inocua para la salud.
+ La cerámica magnética de NOMAD aúna sostenibilidad y rentabilidad.

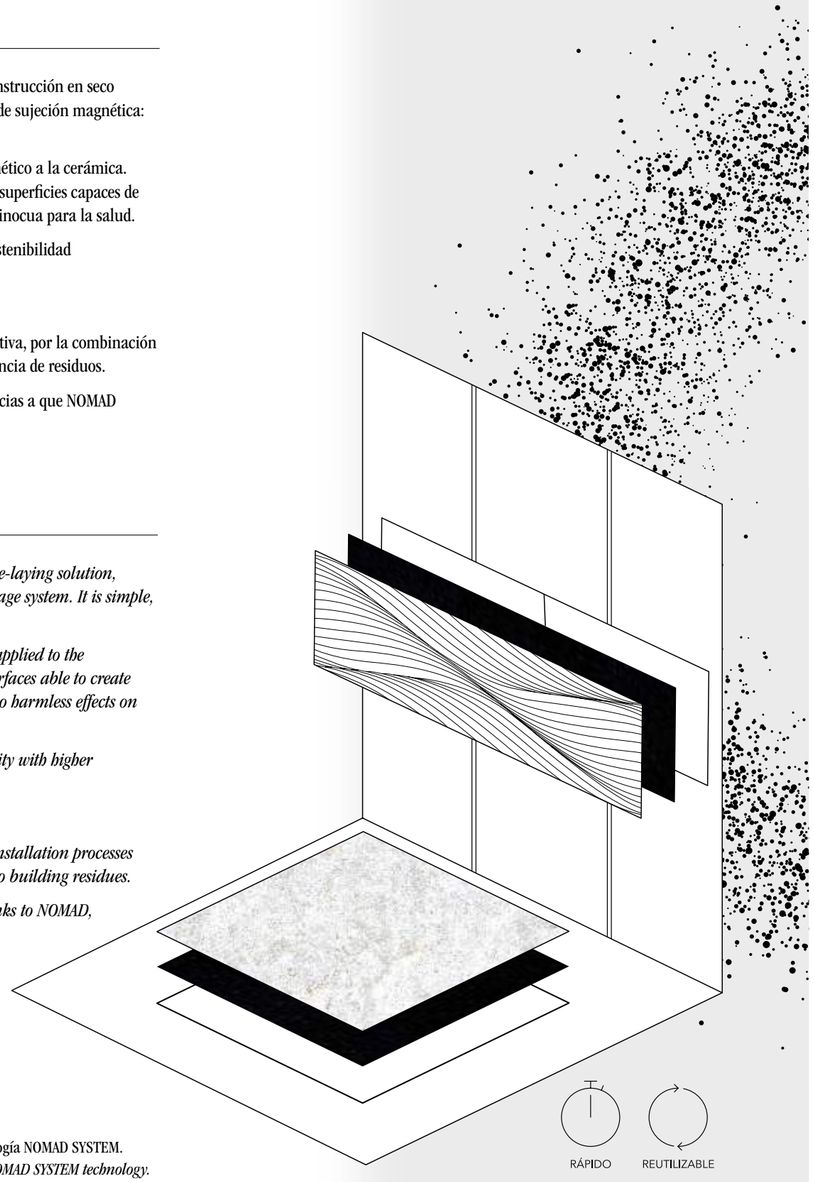

PERONDA ofrece con NOMAD una mejora operativa, por la combinación de la reducción del tiempo de montaje y la ausencia de residuos.

Y esto se une a los nuevos usos del material, gracias a que NOMAD permite una fácil reutilización de las piezas.

+ *NOMAD is Peronda's revolutionary dry tile-laying solution, based on an innovative magnetic anchorage system. It is simple, functional and eco-friendly.*
+ *With NOMAD, a ferromagnetic coating is applied to the ceramic tiles. The tiles are then laid on surfaces able to create a permanent tight magnetic bond, with no harmless effects on people's health.*
+ *NOMAD's magnetic tiles unite sustainability with higher cost-effectiveness.*

With this system, Peronda guarantees easier installation processes through a reduction in assembly times and no building residues.

The tiles can also be repurposed because, thanks to NOMAD, they can easily be re-used elsewhere.

Shaped tech

Real precision.

NATURAL

Las texturas, los recovecos, las vetas que crea la naturaleza son caprichosas, y esa es la fuente de su belleza. No hay dos iguales, y en su singularidad radica su belleza. La pasión por la búsqueda del detalle ha llevado a Peronda a desarrollar una tecnología capaz de reproducir la naturaleza en su máxima expresión, que es captando hasta el mínimo detalle. Los relieves son creados con tecnología digital perfectamente coordinada con la impresión gráfica para generar las piezas más naturales vistas en cerámica.

PRECISO

Donde ponemos el relieve ponemos la tinta. La precisión con la que imprimimos nuestras piezas es milimétrica, pues relieve y gráfica casan a la perfección para obtener un resultado técnicamente inmejorable.

REAL

Nada de ilusiones ópticas, esto es real. Lo que ves y lo que tocas es lo mismo. La veta está donde está el relieve y viceversa. Lo que siempre quisimos en cerámica, ahora lo consigue Peronda.

NATURAL

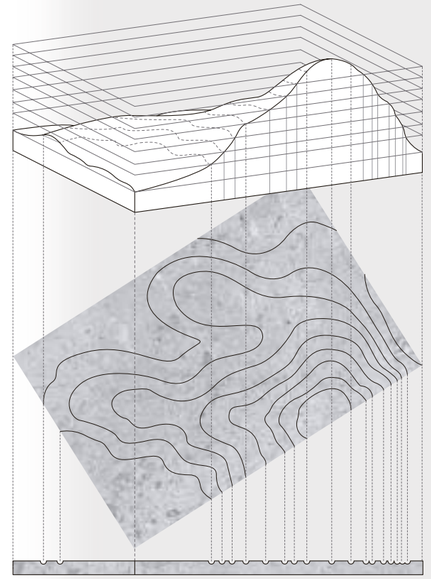

The textures, sinuosity and veining found in nature all follow capricious rules, and it is this random nature that makes them so very lovely. Nothing is ever identical and this singularity is the secret to nature's beauty. Peronda's passion for detail has led it to develop technology able to reproduce nature in its maximum of expressions, captured down to the tiniest of details. Digital technology is used to create textures that coincide perfectly with the printed pattern, leading to some of the most natural looking designs ever to be seen on ceramic tiles.

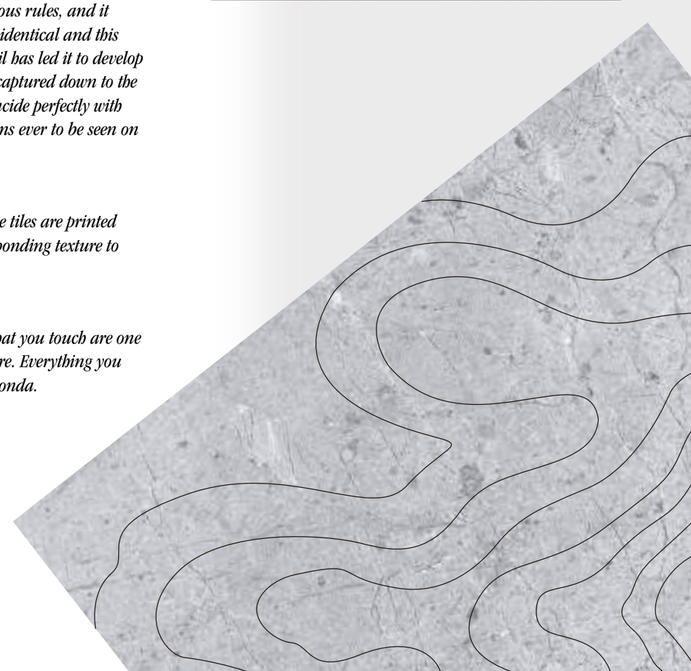

PRECISE

Our printing inks reach each and every part of the printed texture. The tiles are printed with absolute precision, carefully marrying the design with the corresponding texture to unparalleled technical effect.

REAL

There are no optical illusions. Everything is real. What you see and what you touch are one and the same thing. The printed veins coincide perfectly with the texture. Everything you have always longed for in ceramic tiles has now been achieved by Peronda.

20MM

Extraordinary resistance.

LO MÁS ROBUSTO DE PERONDA

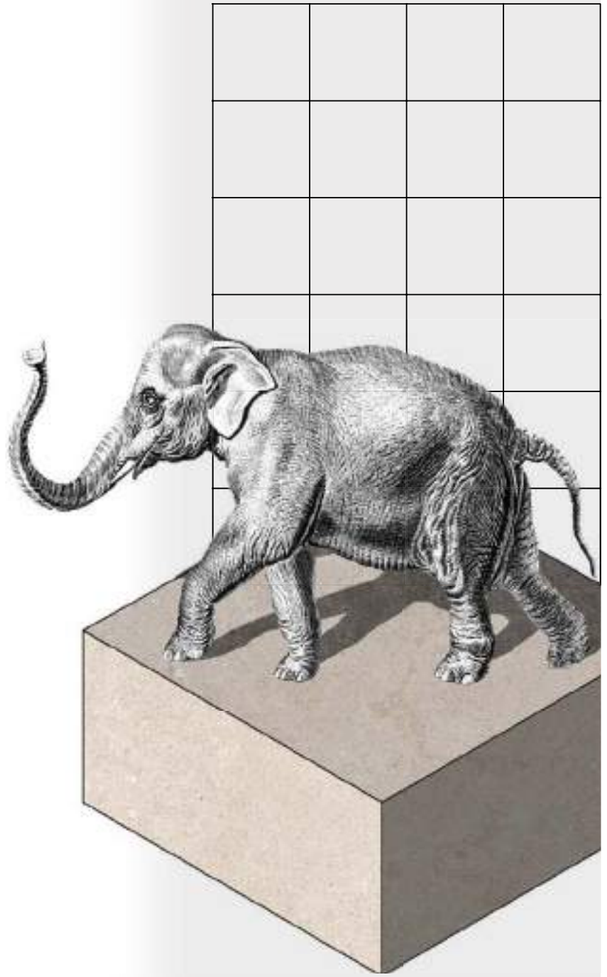

La última tecnología en producción cerámica se materializa en 20 mm, el porcelánico de mayor espesor con todos los beneficios de 4D Tech en el producto más robusto de Peronda.

MAYOR ESPESOR SIN COSTILLA

Somos pioneros en producir piezas de este espesor con prensa continua. Además de todas las características de un producto 4D, 20 mm permite la ausencia de costilla en la pieza.

RESISTENCIA EXTRAORDINARIA

La base plana del 20 mm ofrece un total contacto con la superficie de soporte. Sobre plots u otro material, el resultado es más resistente, pues toda la pieza absorbe el impacto.

PERONDA´S MOST ROBUST

The latest technology in ceramic production becomes a reality in 20 mm. The thickest porcelain with all the benefits of 4D Tech in Peronda's most robust product.

THICKER WITHOUT RIBBING

We are pioneers in producing pieces of this thickness with continuous press. Besides all the features of a 4D product, 20 mm allows for the lack of ribbing.

EXTRAORDINARY RESISTANCE

The flat base of 20 mm offers complete contact with the supporting area. Be it on plots or any other material, it is more resistant since the whole piece absorbs the impact.

All in one

Antislip soft.
Unlimited purposes.

USOS ILIMITADOS. MISMA SUPERFICIE

¿Imaginas poder tener un mismo suelo con iguales cualidades en todos los espacios de tus proyectos? El acabado All in one aúna suavidad y antideslizamiento. Ahora no hay por qué elegir, puedes tenerlo todo en un único producto.

Mejoras destacadas:

+ Zonas húmedas ahora son más suaves y fáciles de limpiar gracias al nuevo acabado de Peronda.
+ El nuevo acabado All in one de Peronda permite reducir el stock al satisfacer diversas necesidades técnicas con una sola referencia.
+ Mayor armonía al poder transitar del salón a la terraza sin preocuparse por los formatos o tonos, gracias a la colocación sin límites que brinda continuidad estética.

UNLIMITED PURPOSES. SAME SURFACE

Can you imagine having the very same flooring with identical features in every single space of your project? All in one finish brings softness and anti slip treatment together. There is no need to choose any more. You can have it all in just one product.

Highlights:

+ *Humid areas are now smoother and easier to clean with Peronda's new finish, providing increased softness and cleanliness.*
+ *Peronda's new finish, All in one, allows for stock reduction by offering a single product that meets various technical requirements for your project.*
+ *The freedom of placing materials without limitations creates a sense of aesthetic continuity, enabling seamless transitions from the living room to the terrace, irrespective of formats or tones.*

Deep tech

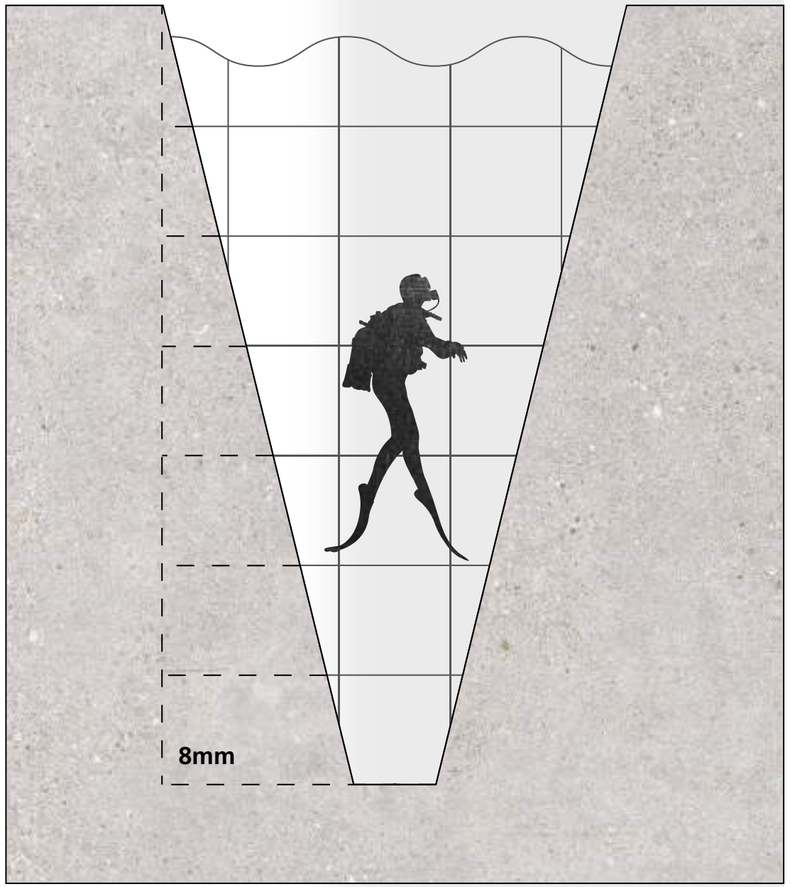

Maximum relief.

Permite realizar relieves con un nivel de profundidad extraordinario, llegando hasta los 8 mm de relieve.

Esta nueva tecnología abre un universo de posibilidades decorativas.

Relief surfaces can be created with an extraordinary depth, with reliefs as deep as 8 mm.

This new technology opens up new broad-ranging decorative potential.

Layer tech

Multi texture surface.

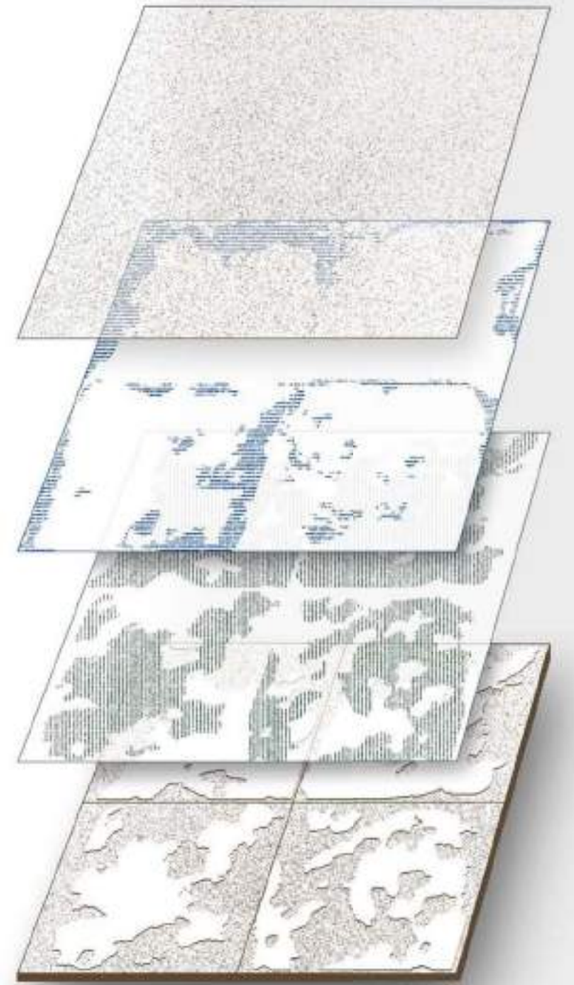

Layer Tech es la última tecnología de decoración cerámica, que permite crear texturas en diferentes capas de la superficie generando efectos variados en una misma pieza. Acabados espectaculares hasta ahora imposibles de conseguir en cerámica.

Con esta técnica se abre un infinito abanico de posibilidades en decoración cerámica puesto que se trata de combinar distintas materias, colores y formas en un proceso de adición en el que cada combinación puede generar un efecto totalmente nuevo y sorprendente.

Layer Tech is the latest in tile printing technology. With it, textures can be created on different surface layers, generating varying effects on the same tile. This leads to hitherto unimaginable spectacular finishes on the tiles.

Layer Tech technology opens up endless new possibilities in ceramic tile printing, since different materials, colours and shapes can be combined. In this additive process, each combination gives rise to a totally new amazing effect.

Enter with the QR code and learn all about our LAYER TECH technology.

Soft

The smoothest one.

SUAVE, SEDOSO Y FÁCIL DE LIMPIAR

El acabado SOFT es la perfecta elección para hacer de cualquier espacio un lugar más confortable. Gracias a su material sedoso, ofrece una superficie de extrema suavidad muy fácil de limpiar, pues impide que la suciedad se adhiera. El broche ideal para tu vivienda o local comercial.

SMOOTH, SILKY AND EASY TO CLEAN

SOFT is a finish conceived to bring added comfort and convenience to settings of all kinds. Thanks to its silky feel, this is a very smooth, easy-to-clean surface since it prevents the build-up of dirt. The perfect crowning touch to homes or commercial premises!

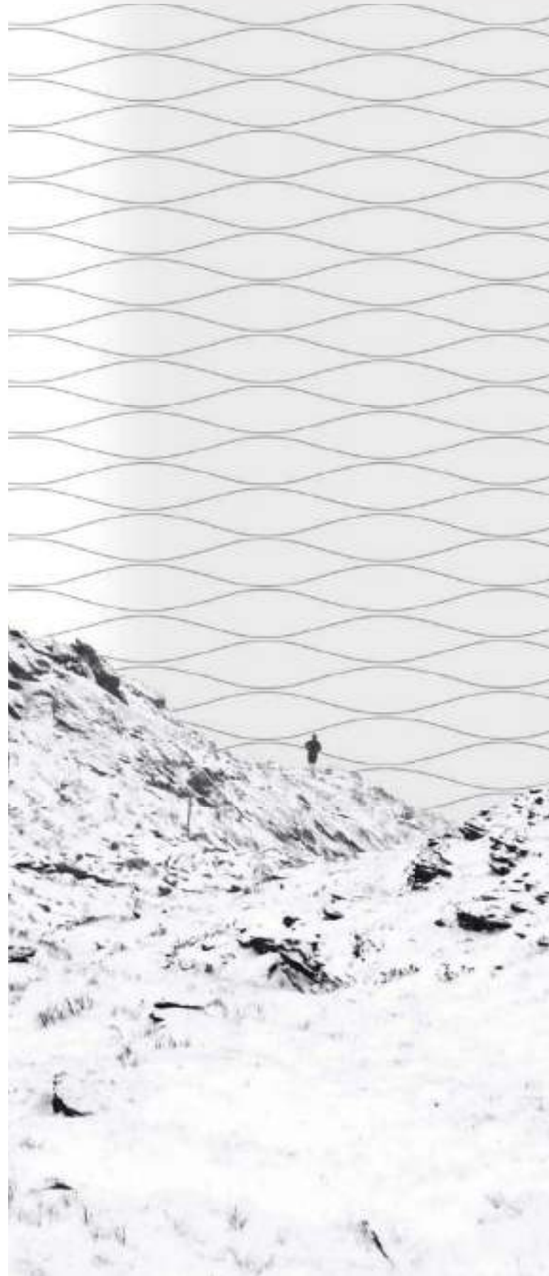

Extra white

Con todos los esfuerzos tecnológicos concentrados en nuevas formulaciones de esmaltes, podemos ofrecer el blanco cerámico más puro hasta la fecha, que cuenta además con una suavidad incomparable.

Se trata del acabado Extrawhite presente en las colecciones ICE y COTTON. Los espacios se tornan más luminosos, neutros y confortables aportando así el valor diferencial que continuamente ofrecen nuestros productos, resultado de nuestra conocida pasión por el detalle.

Thanks to the technological efforts we channel into finding new glaze formulae, we have come up with the most ultra-white tile finish to date, with the added benefit of an unparalleled smooth surface.

This is our Extrawhite finish, available in the ICE and COTTON collections. Extrawhite infuses settings with a more luminous, neutral, comfortable appearance, lending them that singular appeal that all our products offer, thanks to Peronda's well-known passion for detail.

4D Tech

EL FUTURO CERÁMICO NO ES QUÉ. ES CÓMO

4D TECH es el sistema de producción cerámica más innovador del mercado.
Un nuevo estándar para la máxima calidad.

EL NUEVO PERONDA DE SIEMPRE

Nueva tecnología, mismos valores. 4DTECH aporta mayor precisión, versatilidad y eficiencia sin olvidar la calidad y la sostenibilidad.

WITH TECHNOLOGY AS OUR ACE CARD

4D TECH is the most innovative tile manufacturing system on the market, raising standards in a bid to achieve maximum quality.

A NEW YET FAMILIAR PERONDA

New technology but still the same values. 4DTECH ensures greater precision, versatility and efficiency, not to mention quality and sustainability.

Honed

The value of the passing of time.

ETERNO

Brillo satinado irregular que nos evoca el resultado del paso del tiempo sobre una superficie noble. La belleza de los elementos que cuanto más envejecen mayor valor tienen, más bonitos son, más historias atesoran.

Todo ello ligado a un tacto especialmente suave que transforma cualquier interior en un lugar especial, cálido, donde nos sentimos cómodos y seguros.

ETERNAL

Uneven polished brightness evoking the result of the passing of time on a fine surface. The beauty of elements that the more they get old, the more value they have, the more beautiful they are and the more number of stories they treasure.

All of this is bound to quite a soft touch that turns any indoor area into a special, warm place where we feel safe and comfortable.

The tile's natural finish, conserving all its natural characteristics so as to enhance the details of its pattern.

LAPADO _LA

Superficies semipulidas que aportan brillo natural a cualquier tipo de espacio.

A semi-polished surface that brings a natural shine to all settings where it is used.

ANTISLIP _A

Porcelánicos de aspecto mate y una delicada textura con características antideslizante.

Matt porcelain tiles with a delicate texture and non-slip grip.

BUSH HAMMERED _BHMR

Suave relieve que confiere textura en superficies de aspecto mate y tacto único.

A matt surface with a gentle relief texture and unique feel.

ANTISLIP BUSH HAMMERED _ABHMR

Porcelánico antideslizante con rugosidad imperceptible al tacto.

Non-slip porcelain tiles, with a roughness imperceptible to the touch.

Los tamaños de las piezas complementarias estarán determinados por los tamaños de las piezas de la colección. Esto significa que cada pieza complementaria será diseñada y fabricada para coincidir perfectamente con las dimensiones de las piezas principales de la colección

Pool piece

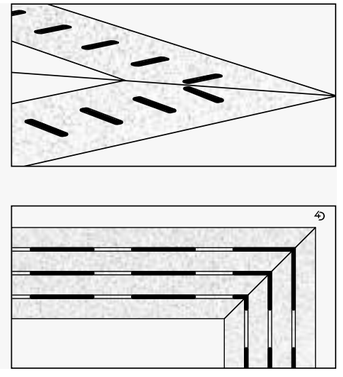

15 * 50 * 2 cm | 6 * 20” P54

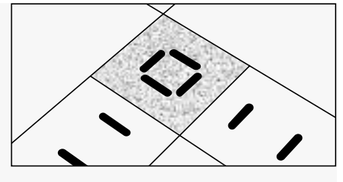

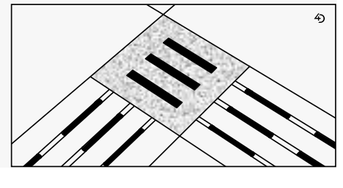

15 * 50 * 2 cm | 6 * 20” P86
(PACK 2 units)

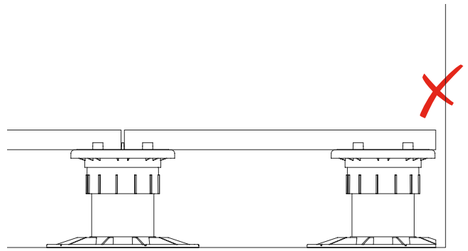

15 * 15 * 2 cm | 6 * 6” P71

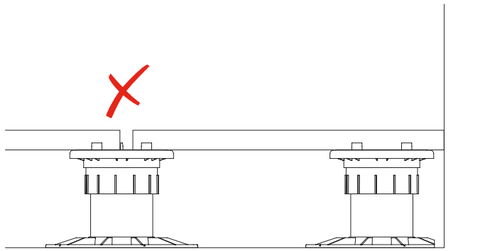

The sizes of the complementary pieces will be determined by the sizes of the pieces in the collection. This means that each complementary piece will be designed and manufactured to perfectly match the dimensions of the main pieces in the collection.

Instalación de pavimento elevado con plots

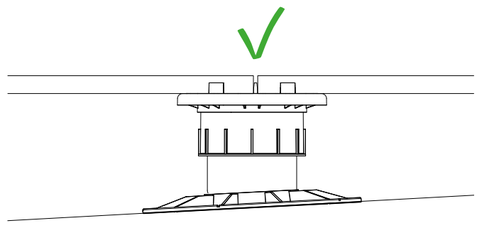

USO DE DILATADORES

Utilice dilatadores perimetrales para crear juntas de ancho fijo entre baldosas, y para evitar desplazamientos horizontales.

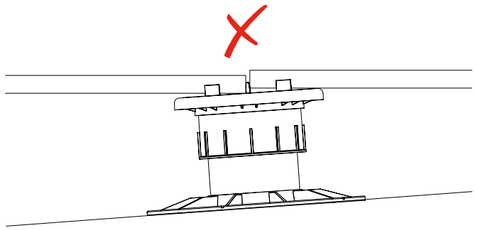

USING DILATORS

The perimeter of the tiles must be perfectly confined to avoid horizontal sliding. Perimeter dilators or elastic joints must be used to prevent such movement, always avoiding leaving open joints.

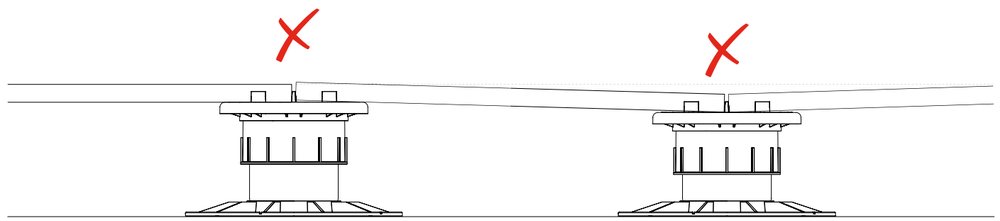

CORRECCIÓN DE PENDIENTE EN BASE O CABEZA

Evita que aparezcan pequeños escalones en la superficie del pavimento corrigiendo la pendiente en la base o cabeza del Plot.

SLOPE CORRECTION AT THE BASE OR ON THE HEAD

Prevents small steps from appearing on the pavement surface by correcting the slope at the base or on the head of the pedestal.

BLOQUEO DE ALTURA DEL PLOT

Evita movimientos indeseados del Plot a causa de vibraciones con el paso del tiempo. Reduce el mantenimiento que necesita la instalación.

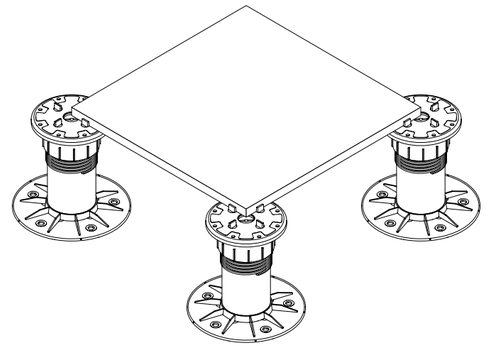

PEDESTAL HEIGHT LOCK

Prevents unwanted height movements of the pedestal due to vibrations over time. Reduces the maintenance needed by the installation.

PEYGRAN

Installation of raised pavement with pedestals

Instalación recomendada para baldosa porcelánica de 20 mm de espesor:
Recommended installation for 20 mm thick ceramic tiles:

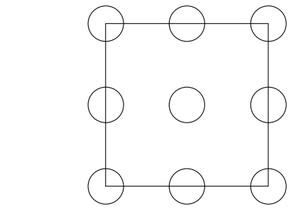

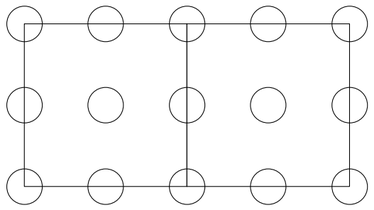

FORMATO 100 * 100 cm

Uso privado o público.
9 Plots en todos los casos.

TILE FORMAT 39 * 39”

Private use o public use
9 pedestals in all cases.

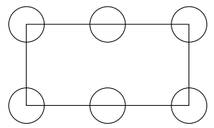

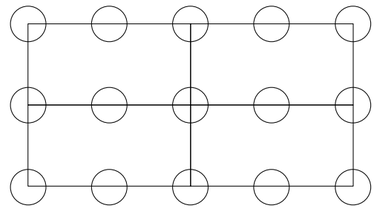

FORMATO 50 * 100 mm

Uso privado o público.
6 Plots en todos los casos.

TILE FORMAT 20 * 39”

Private use o public use
6 pedestals in all cases.

El colocador debe seguir siempre las recomendaciones del fabricante de plots. The installer must always follow the plot manufacturer’s recommendations

PEYGRAN

Normativa

INFORMACIÓN TÉCNICA

La norma UNE-EN 14411 establece las características técnicas y los requisitos que deben cumplir las baldosas cerámicas para ser utilizadas como pavimento de suelos y revestimiento de paredes. Asimismo, hace referencia a los métodos de ensayo (normas ISO 10545) aplicables para determinar las características incluidas en esta norma y verificar si cumplen o no con los requisitos establecidos.

Para la aplicación de esta norma y para determinar los requisitos para el cumplimiento de las características definidas, las baldosas se dividen en grupos en función de la absorción de agua que presenten:

Baldosas cerámicas prensada en seco con una absorción de agua	
$E_b \leq 0.5\%$	**GRUPO BIa**
$0.5\% < E_b \leq 3\%$	**GRUPO BIb**.
$3\% < E_b \leq 6\%$	**GRUPO BIIa**
$E_b > 10\%$	**GRUPO BIII.**

RESISTENCIA AL DESLIZAMIENTO

En la actualidad, no se dispone de un método de ensayo consolidado para determinar la resistencia al deslizamiento. Existen varios métodos de ensayo:

1.- NORMA UNE 41901 EX EN HÚMEDO

En España, el CTE (Código Técnico de la Edificación) establece las exigencias básicas de seguridad que deben cumplir los suelos en función de su localización y características. El Documento Básico Seguridad de Utilización y Accesibilidad (DB SUA), Sección SUA-1 Seguridad frente al riesgo de caídas, define los requisitos de resistencia al deslizamiento que deben cumplir los suelos de los edificios de uso residencial, público, sanitario, docente, comercial, administrativo y pública concurrencia conforme a su resistencia al deslizamiento Rd.

Los suelos se clasifican en cuatro grupos en función de su resistencia al deslizamiento:

Resistencia al deslizamiento R_d	Clase
$R_d < 15$	0
$15 < R_d < 35$	1
$35 < R_d < 45$	2
$R_d > 45$	3

El valor de Rd se determina mediante el ensayo del péndulo descrito en la norma de ensayo UNE 41901 EX.

En la siguiente tabla se describe la clase exigible que deben tener los suelos en función de su localización:

Zona	Clase
Zonas interiores secas	
Superficies con pendiente menor del 6%	1
Superficies con pendiente igual o mayorque el 6% y escaleras	2
Zonas interiores húmedas, tales como entradas a los edificios desde el exterior (1), terrazas cubiertas, baños, cocinas, etc	
Superficies con pendiente menor del 6%	2
Superficies con pendiente igual o mayor que el 6% y escaleras	3
Zonas interiores donde, además de agua, pueda haber agentes (grasas, lubricantes, etc.) que reduzcan la resistencia al deslizamiento, tales como cocinas industriales, mataderos, aparcamientos, zonas de uso industrial, etc.	3
Zonas exteriores. Piscinas (2)	3

(1) Excepto cuando se trate de accesos directos de uso restringido.

(2) En zonas previstas para usuarios descalzos y en el fondo de los vasos, en las zonas en las que la profundidad no exceda de 1,50 m.

2.-NORMA BS 7976-2

En Reino Unido, diferentes asociaciones y organismos han planteado una clasificación de la seguridad de los suelos en función de la resistencia al deslizamiento. Esta resistencia se basa en determinar el valor del PTV (Pendulum Test Value) mediante el ensayo del péndulo descrito en la norma BS 7976-2. Según el valor del PTV tendremos:

PTV 96	Riesgo potencial de deslizamiento
< 24	alto
24 - 35	moderado
36 - 64	bajo
> 65	muy bajo

Para valores de PTV ≥ +36, los suelos se declaran con bajo riesgo de deslizamiento.

3.-NORMA DIN 51130 Y DIN 51097

Las normas alemanas DIN 51130 y DIN 51097 realizan una clasificación de los suelos en función de su resistencia al deslizamiento de acuerdo con el método de ensayo de la rampa:

DIN 51130 – Método de la rampa para pies calzados. Establece una clasificación R en función del ángulo de inclinación que varía de R9 a R13, siendo R9 el menor valor, definido como baja resistencia al deslizamiento.

Ángulo de inclinación medio (&)	Resistencia al deslizamiento
$6° \leq \& \leq 10°$	R9
$10° \leq \& \leq 19°$	R10
$19° \leq \& \leq 27°$	R11
$27° \leq \& \leq 35°$	R12
35° <&	R13

Regulation

En función del valor de R o de resistencia al deslizamiento, se recomiendan los siguientes usos para los suelos:

Resistencia Deslizamiento	Descripción	Recomendado para
R9	Riesgo alto deslizamiento	Zonas interiores secas incluidas las entradas interiores. No utilizar en zonas exteriores.
R10	Riesgo moderado deslizamiento	Zonas interiores secas que están sujetas a humectación ocasional como baños o garajes.
R11	Riesgo bajo deslizamiento	Zonas externas y zonas húmedas incluidos los entornos industriales y entradas a los edificios de tipo residencial o públicos.
R12	Riesgo bajo deslizamiento	Zonas externas y zonas húmedas como entradas desde el exterior, caminos, aparcamientos, piscinas. En zonas interiores en cocinas profesionales, duchas.
R13	Riesgo bajo deslizamiento	Zonas externas y zonas muy húmedas como piscinas, parques acuáticos. También en zonas industriales que se trabaje con líquidos. Zonas de alto riesgo en resbalarse.

DIN 51097 - Método de la rampa para pies descalzos. La resistencia al deslizamiento se clasifica como A, B o C siendo A el menor valor.

Ángulo de inclinación medio (&)	Resistencia al deslizamiento
≥ 12°	A
≥ 18°	B
≥ 24°	C

En función del valor de la resistencia al deslizamiento, se recomiendasn los siguientes usos para suelos:

Resistencia Deslizamiento	Descripción	Adecuado para
A	Riesgo alto deslizamiento	Zonas secas de pies descalzos
B	Riesgo moderado deslizamiento	Zonas de playa de piscinas y duchas
C	Riesgo bajo deslizamiento	Zonas de rampas húmedas, suelos de piscinas y suelos de jacuzzis.

4.-NORMA ANSI A 137.1

El DCOF (Coeficiente de fricción dinámico) es una medida de la resistencia al deslizamiento que se realiza con un tribómetro BOT-3000 según el método descrito en la norma ANSI A 137.1 del Instituto Nacional Estadounidense de Estándares (ANSI).

Según esta norma, los suelos interiores sobre los que se prevé que se camine mientras están húmedos deben de tener un valor mínimo de DCOF>0.42. Los suelos que no cumplan con este valor de DCOF no están limitados a colocarse en zonas secas sino en suelos que se mantengan secos mientras se camina.

RESISTENCIA A LA ABRASIÓN

1.- ISO 10545-7

Para baldosas cerámicas destinadas al revestimiento de suelos, el ensayo se realiza según la metodología definida en la norma ISO 10545-7. La norma UNE-EN 14411 establece la obligatoriedad de declarar la clase de abrasión y el número de revoluciones. Según esta misma norma, cuando se exija, se puede declarar la clase de abrasión según el Anexo N (informativo) que clasifica las baldosas cerámicas esmaltadas según la resistencia a la abrasión:

PEI 1	Uso residencial tráfico ligero
PEI 2	Uso residencial tráfico moderado
PEI 3	Uso comercial tráfico ligero
PEI 4	Uso comercial tráfico moderado
PEI 5	Uso comercial tráfico intenso

2.-ISO 10545-6

La Norma UNE-EN 14411 especifica una resistencia a la abrasión profunda mínima para todas las baldosas no esmaltadas (UGL), expresada como volumen máximo admisible de material exportado tras la conclusión del ensayo (en mm3).

El ensayo se realiza según la metodología definida en la norma ISO 10545-6. La norma UNE-EN 14411 establece un valor máximo de volumen de materia pérdida (expresada en mm3) para las baldosas no esmaltadas del Grupo BIa de 175 mm3.

Normativa

TECHNICAL INFORMATION

The UNE-EN 14411 standard sets the technical characteristics and requirements that ceramic tiles must meet to be used as flooring and wall cladding. It also references the test methods (ISO 10545 standards) applicable for determining the characteristics included in this standard and verifying whether they comply with the established requirements.

For the application of this standard and to determine the requirements for compliance with the defined characteristics, tiles are divided into groups based on their water absorption:

Dry-pressed ceramic tiles with water absorption	
$E_b \leq 0.5\%$,	**GRUPO BIa**
$0.5\% < E_b \leq 3\%$	**GRUPO BIb**.
$3\% < E_b \leq 6\%$,	**GRUPO BIIa**
$E_b > 10\%$,	**GRUPO BIII.**

SLIP RESISTANCE

Currently, there is no consolidated testing method to determine slip resistance. There are several testing methods:

1.- UNE 41901 EX WET EN METHOD

In Spain, the CTE (Código Técnico de la Edificación) establishes the basic safety requirements that floors must meet depending on their location and characteristics. The Basic Document on Use and Accessibility Safety (DB SUA), Section SUA-1 Safety against the risk of falls, defines the slip resistance requirements that floors in residential, public, health, educational, commercial, administrative, and public assembly buildings must meet according to their slip resistance Rd.

Slip Resistance R_d	Class
$R_d < 15$	0
$15 < R_d < 35$	1
$35 < R_d < 45$	2
$R_d > 45$	3

The value of Rd is determined by the pendulum test described in the testing standard UNE 41901 EX.

The following table describes the required class that floors must have depending on their location:

Zone	Class
Dry indoor areas	
Surfaces with a slope less than 6%	1
Surfaces with a slope equal to or greater than 6% and stairs	2
Indoor wet areas, such as entrances to buildings from the exterior (1), covered terraces, bathrooms, kitchens, etc.	
Surfaces with a slope less than 6%	2
Surfaces with a slope equal to or greater than 6% and stairs	3
Indoor areas where, in addition to water, there may be agents (grease, lubricants, etc.) that reduce slip resistance, such as industrial kitchens, slaughterhouses, parking lots, industrial use areas, etc	3
Outdoor areas. Pools (2)	3

(1) Except when they are direct accesses for restricted use..

(2) In areas intended for barefoot users and in the bottoms of pools where the depth does not exceed 1.50 meters.

2.-NORM BS 7976-2

In the United Kingdom, various associations and organizations have established a classification for floor safety based on slip resistance. This resistance is determined by measuring the Pendulum Test Value (PTV) using the pendulum test described in the BS 7976-2 standard. According to the PTV value, we have the following classifications:

PTV 96	Risk of Slipping
< 24	High
24 - 35	Moderate
36 - 64	Low
> 65	Very Low

For PTV values ≥ +36, floors are declared to have a low risk of slipping..

3.-NORM DIN 51130 AND DIN 51097

The German standards DIN 51130 and DIN 51097 classify floors based on their slip resistance according to the ramp test method:

DIN 51130 – Ramp method for shod feet. It establishes an R classification based on the angle of inclination ranging from R9 to R13, with R9 being the lowest value, defined as low slip resistance.

Average incline angle (&)	Slip resistance
6° ≤ & ≤ 10°	R9
10° ≤ & ≤ 19°	R10
19° ≤ & ≤ 27°	R11
27° ≤ & ≤ 35°	R12
35° <&	R13

Regulation

Depending on the R value or slip resistance, the following uses are recommended for floors:

Slip Resistance	Description	Recommended for
R9	High risk of slipping	Dry indoor areas including indoor entrances. Not recommended for outdoor areas.
R10	Moderate risk of slipping	Dry indoor areas subject to occasional moisture such as bathrooms or garages.
R11	Low risk of slipping	Outdoor areas and wet areas including industrial environments and entrances to residential or public buildings.
R12	Low risk of slipping	Outdoor areas and wet areas such as entrances from the exterior, pathways, parking lots, pools. In indoor areas like professional kitchens, showers.
R13	Low risk of slipping	Outdoor areas and very wet areas such as pools, water parks. Also in industrial areas where working with liquids. Areas with high risk of slipping.

DIN 51097 - Ramp method for barefoot feet. Slip resistance is classified as A, B, or C, with A being the lowest value.

Average incline angle (α)	Slip resistance
≥ 12°	A
≥ 18°	B
≥ 24°	C

Depending on the R value or slip resistance, the following uses are

Slip Resistance	Description	Suitable for
A	High risk of slipping	Dry areas for barefoot pedestrians
B	Moderate risk of slipping	Beach areas of pools and showers
C	Low risk of slipping	Wet ramp areas, pool floors, and jacuzzi floors

4.-NORMA ANSI A 137.1

The Dynamic Coefficient of Friction (DCOF) is a measure of slip resistance conducted using a BOT-3000 tribometer according to the method described in the ANSI A 137.1 standard from the American National Standards Institute (ANSI).

According to this standard, indoor floors expected to be walked on while wet must have a minimum DCOF value of >0.42. Floors that do not meet this

ABRASION RESISTANCE

1.-ISO 10545-7

For ceramic tiles intended for floor covering, the test is conducted according to the methodology defined in ISO 10545-7. The UNE-EN 14411 standard requires the declaration of the abrasion class and the number of revolutions. According to this standard, when required, the abrasion class can be declared according to Annex N (informative), which classifies glazed ceramic tiles according to their resistance to abrasion:

PEI 1	Residential use with light traffic
PEI 2	Residential use with moderate traffic
PEI 3	Commercial use with light traffic
PEI 4	Commercial use with moderate traffic
PEI 5	Commercial use with heavy traffic

2.-ISO 10545-6

The UNE-EN 14411 standard specifies a minimum resistance to deep abrasion for all unglazed tiles (UGL), expressed as the maximum allowable volume of material removed after the completion of the test (in mm3).

The test is conducted according to the methodology defined in ISO 10545-6. The UNE-EN 14411 standard establishes a maximum value of volume of material loss (expressed in mm3) for unglazed tiles of Group Bla as 175 mm3.

Manipulación

RECOMENDACIONES MANIPULACIÓN

_La manipulación de las baldosas cerámicas debe realizarse prestando atención y con la máxima seguridad para evitar caídas o roturas. Se recomienda realizar esta operación con guantes de protección para evitar lesiones que puedan derivar de la rotura del material o de la existencia de alguna arista cortante.

_Para piezas de gran tamaño, se recomienda su manipulación y/o trasladado de una a una y por dos operarios, como mínimo. La extracción de las piezas de su embalaje se puede realizar manualmente o mediante algún sistema regulado por ventosas. Si se realizar mediante este último, humedecerlas con anterioridad. Si se utiliza sistema de manipulación o traslado mecánico como sistema regulado por ventosas, seguir las instrucciones del fabricante. Se recomienda trasladar la baldosa de forma vertical. Evitar la flexión de las piezas por su parte central. Para preservar la pieza, no apoyarla directamente ni sobre el suelo ni sobre la pared. apoyarla sobre soportes de corcho o cualquier otro material que resista su peso.

_Si se trata de baldosas rectificadas, tanto su manipulación como colocación debe de realizarse cuidadosamente, evitando los golpes entre piezas que puedan dañar las aristas.

RECOMENDACIONES COLOCACIÓN

_La colocación se debe realizar por personal cualificado.

_Antes de la colocación, se recomienda comprobar que las baldosas cerámicas se encuentren en perfectas condiciones. Se recomienda revisar tono, acabado y calibre. Extender varias piezas, de varias cajas, para comprobar cuál sería el efecto estético final. No se admitirán reclamaciones o devoluciones de materiales ya colocados.

_Seleccionar las herramientas y útiles de trabajo adecuados para facilitar la correcta instalación de las baldosas cerámicas:

- Ventosas
- Maza de goma
- Llana dentada
- Sistemas de nivelación
- Crucetas
- Cortadora baldosas cerámicas
- Pinza de tracción ajustable
- Cubo, esponja y fregona

_Para una correcta instalación, es necesario que el soporte o la superficie este completamente limpia, seca y sin residuos que puedan ocasionar puntos débiles de adhesión. Debe de estar nivelada, plana y posees la estabilidad adecuada.

_Disponer de juntas perimetrales, que ayudaran a absorber movimientos estructurales tras la instalación del material. Suelen localizarse en los perímetros de los sistemas cerámicos, en los cambios de planos o dispositivos como sumideros, elementos de carpintería, pilares, etc. Deben ser continuas y su anchura no debe ser menor de 8 mm. Estas juntas deben llegar hasta el soporte y normalmente quedarán ocultas por el rodapié.

_En espacios de grandes dimensiones se recomienda dejar juntas estructurales, según indicaciones del proyectista, con el objetivo de disminuir las tensiones ocasionadas por movimientos estructurales.

_Seleccionar el material de agarre en función de tipo de baldosa cerámica que se desea colocar, el lugar de instalación (interior o exterior) y la climatología a la que se va a exponer el producto (temperatura ambiental, zonas húmedas, etc.). Para revestimiento interior de porosa blanca aconsejamos material de agarre tipo C1 y para revestimiento y pavimento interior y exterior de porcelánico aconsejamos como mínimo, tipo C2 cuando en la caja o en cualquier documento no se indique lo contrario. Para grandes formatos además de tipo C2, se recomienda que sea flexible. En zonas húmedas se recomienda el uso de materiales impermeables. Para colocación sobre suelo radiante, de materiales flexibles. Respetar las recomendaciones del fabricante en la preparación y utilización del material de agarre.

_Se recomienda la técnica de colocación en capa fina con llana dentada, que se caracteriza por un espesor del material de agarre de entre 1-1,5mm. Para asegurar el mismo espesor del material de agarre en toda la superficie, se recomienda el uso de la llana dentada. Cuando se utilice esta técnica, las baldosas cerámicas deben de estar secas. No se recomienda su humidificación con agua.

_Para baldosas de grandes formatos se recomienda el sistema de capa fina con doble encolado que consiste en la aplicación de una capa del material de agarre en la superficie o soporte y también en el reverso de la baldosa a instalar. Em ambos casos el material de agarre debe de estar distribuido uniformemente por toda la superficie.

_Para asegurar el encolado completo de la baldosa, golpear o presionar la superficie con una maza de goma blanca, nunca de color negro o gris.

_Las juntas de colocación se deben de elegir en función del tipo y formato de la baldosa, sus características dimensionales o de dilatación, etc. No se recomienda la colocación sin junta. La norma UNE 138002 recomienda juntas de colocación mínimas de 1.5mm en espacios interiores y 5mm es espacios exteriores.

_Se recomienda el uso de crucetas separadoras autonivelantes para evitar posibles desniveles de las baldosas, sobre todo en la colocación trabada y de grandes formatos. Apretar con la tenaza sin superar el punto de rotura de esta. Antes de utilizar el sistema de crucetas autonivelantes, se recomienda comprobar que no dañen la superficie de la baldosa cerámicas, sobres todo en baldosas con relieve o rectificadas.

_Selección del material de rejuntado en base a la norma UNE 138002:

AMBIENTE DE DESTINO DEL REVESTIMIENTO CERÁMICO	
Condiciones de uso doméstico en recintos secos	**CG1**
Condiciones de uso doméstico en recintos húmedos	**CG2W**
Pavimentos y revestimientos exteriores	**CG2WA**
Condiciones que requieran estanquidad al agua y al vapor	**RG**
Condiciones de inmersión (piscinas, spa, balnearios...) con tratamiento de agua clorada	**CG2WA/RG**
Condiciones de inmersión (piscinas, spa, balnearios...) de elevada exigencia o con tratamiento de electrólisis salina o agua de mar	**RG**
Condiciones de altas exigencias mecánicas y/o químicas	**RG**
Condiciones de usos alimentarios y/o sanitarios	**RG**

_En pavimentos, proceder al rejuntado de las baldosas 48 horas después de su instalación. En revestimientos, tras 24 horas. Antes del rejuntado asegurarse de que las juntas se encuentren perfectamente limpias.

_Retirar el material de rejunte sobrante inmediatamente con la ayuda de una esponja humedecida con agua. No dejar secar el material para evitar problemas de limpieza debidos al endurecimiento del material.

_Una vez finaliza la colocación del material y, mientras dura la obra, proteger la superficie de las piezas para evitar que se dañe la superficie.

Handling

RECOMMENDATIONS FOR HANDLING

_Ceramic tile handling should be carried out attentively and with maximum safety to avoid falls or breakage. It is recommended to wear protective gloves during this operation to prevent injuries that may result from material breakage or sharp edges.

_For large pieces, it is advised to handle and/or transport them one by one and with at least two operators. Removing pieces from their packaging can be done manually or using a suction system. If using the latter, moisten them beforehand. Follow the manufacturer's instructions if using a mechanical handling or transfer system like a suction system. Tiles should be transported vertically to avoid bending them at the center. To preserve the piece, do not directly place it on the floor or against the wall; use cork supports or any other material capable of bearing its weight.

_When dealing with rectified tiles, both handling and installation should be done carefully to avoid impacts between pieces that could damage the edges.

INSTALLATION RECOMMENDATIONS

_Installation should be carried out by qualified personnel.

_Before installation, ensure that the ceramic tiles are in perfect condition. Check tone, finish, and caliber. Lay out several pieces from various boxes to see the final aesthetic effect. No claims or returns will be accepted once materials are installed.

_Select appropriate tools and equipment to facilitate proper ceramic tile installation:

- Suction cups
- Rubber mallet
- Notched trowel
- Leveling systems
- Spacers
- Ceramic tile cutter
- Adjustable traction pliers
- Bucket, sponge, and mop

_For proper installation, the substrate or surface must be completely clean, dry, and free of residues that could weaken adhesion. It should be leveled, flat, and possess adequate stability.

_Use perimeter joints to absorb structural movements after material installation. These joints are typically located on the perimeters of ceramic systems, at changes in planes, or around fixtures like drains, carpentry elements, pillars, etc. They should be continuous and not less than 8 mm wide, extending to the substrate and usually hidden by the skirting board.

_In large spaces, structural joints should be left according to the designer's instructions to reduce stresses caused by structural movements.

_ Select the adhesive material based on the type of ceramic tile you want to install, the installation location (indoor or outdoor), and the climatic conditions the product will be exposed to (ambient temperature, humid areas, etc.). For interior lining of white porous tiles, we recommend using a type C1 adhesive material, and for interior and exterior lining and flooring of porcelain tiles, we advise using at least type C2 adhesive unless otherwise indicated on the box or in any documents. For large formats, in addition to type C2, a flexible adhesive is recommended. In humid areas, the use of waterproof materials is advised. For installation over radiant heating, flexible materials are recommended. Follow the manufacturer's recommendations for preparing and using the adhesive material.".

_The thin-set installation technique using a notched trowel is recommended, with a material thickness between 1-1.5 mm. Ensure uniform thickness across the surface using the notched trowel. Tiles should be dry; do not humidify them with water.

_For large format tiles, the double-bonding thin-set system involves applying bonding material both on the substrate surface and the tile's reverse side. Ensure even distribution of bonding material in both cases.

_To ensure complete bonding, tap or press the surface with a white rubber mallet, avoiding black or gray mallets.

_Choose grout joints based on tile type, size, dimensional characteristics, and expansion. Avoid installation without joints; UNE 138002 recommends minimum grout joints of 1.5 mm for interior spaces and 5 mm for exterior spaces.

_Use self-leveling spacer wedges to prevent tile unevenness, especially for staggered and large format installations. Tighten with pliers without exceeding their breaking point. Before use, ensure the spacers won't damage the tile surface, especially for textured or rectified tiles.

_Select grouting material based on UNE 138002 standards.

DESTINATION ENVIRONMENT OF CERAMIC COATING"	
Domestic use conditions in dry environments	**CG1**
Domestic use conditions in humid areas	**CG2W**
Exterior flooring and cladding	**CG2WA**
Conditions requiring water and vapor tightness	**RG**
Immersion conditions (pools, spas, wellness centers...) with chlorinated water treatment	**CG2WA/RG**
High-demand immersion conditions (pools, spas, wellness centers...) with saltwater electrolysis treatment or seawater	**RG**
Conditions with high mechanical and/or chemical demands	**RG**
Food-grade and/or sanitary use conditions	**RG**

_Grout floors 48 hours after installation and wall coverings after 24 hours. Before grouting, ensure joints are perfectly clean.

_Immediately remove excess grout with a damp sponge to prevent cleaning difficulties due to grout hardening.

_Protect tile surfaces during construction to prevent damage.

Limpieza

LIMPIEZA INSTANTANEA DE RESIDUOS FRESCOS DE COLOCACIÓN

Una vez rejuntado y justo después de la primera limpieza con esponja húmeda, es posible dejar el material ya completamente limpio, evitando el posterior "empañado".

Los productos de la marca FILA INSTANT REMOVER (para junta cementosa) y EPOXY PRO (para junta epoxi) permiten una colocación completa, impecable y conforme a la normativa UNE 138002:2017 en el mismo día del rejuntado.

Las soluciones INSTANT son rápidas, no crean espuma, no necesitan aclarado y no decoloran las juntas.

El procedimiento a seguir es sencillo, una vez rejuntado el material y realizable la primera limpieza con esponja húmeda, se pulveriza INSTANT REMOVER (EXPOXI PRO en junta expoxi) sobre la superficie cerámica, y se deja actuar durante 1-2

minutos. Después de este tiempo, se pasa una esponja humedecida o paño suave.

LIMPIEZA DE FINAL DE OBRA

Después de la colocación es fundamental realizar una buena limpieza con el fin de eliminar residuos de junta y en general suciedad de la obra. Para esta operación recomendamos el empleo de un detergente de acción ligeramente acida que no despida humos tóxicos y respete las juntas, el material y el usuario, como FILA DETERDEK PRO y FABER CEMENT REMOVER. En el caso de material colocado con junta epoxi o en base resina, se aconseja realizar la limpieza final de obra con un limpiador especifico de residuos epoxi, como FILA CR10 y FABER EPOXY CLEANER.

LIMPIEZA DE MANTENIMIENTO

Limpieza Ordinaria:

Para un buen mantenimiento del pavimento se aconseja el empleo de un detergente neutro y con alto poder limpiador como FILA CLEANER PRO y FABER FLOOR CLEANER o SAN-X FLOOR que no deja residuos ni empañados, por lo que elimina las capas de suciedad orgánica.

Limpieza Extraordinaria:

Para eliminar capas de suciedad orgánica intensa y acumulada en el tiempo, se recomienda realizar una limpieza profunda con detergente FILA PS87 PRO y FABER TILE CLEANSER o DEEP DEGREASER (pavimentos pulidos).

El procedimiento consiste en diluir una parte del producto en hasta 10 partes de agua, según el nivel de suciedad, y dejar actuar unos 5 minutos, frotar con cepillo, recoger residuos (ideal con un aspirador de líquidos), y aclarar con abundante agua.

Existen otros muchos tipos de suciedad incrustada, en el siguiente esquema, se especifican los diferentes productos FILA y FABER recomendados, en función del tipo de suciedad a tratar.

TIPO DE SUCIEDAD INCRUSTADA	SOLUCIÓN FABER	SOLUCIÓN FILA
Suciedad orgánica ligera (diaria)	FLOOR CLEANER	CLEANER PRO
Suciedad orgánica intensa	DEEP DEGREASER / TILE CLEANER	PS87 PRO
Grasa, aceite, refrescos, comidas y salsas	DEEP DEGREASER	
Goma, neumáticos		
Tintes, rotulador, pintura plástica	DEEP DEGREASER/TILE CLEANER	
Residuos de detergentes, jabones y ceras		
Residuos junta epoxi	EPOXY CLEANER	CR10
Residuos junta cementosa, salitre	CEMENT REMOVER	DETERDEK PRO-PHZERO
Residuos calcáreos		
Rayas de metales	TILE CLEANER GEL	
Óxidos	DETERDEK	DETERDEK-NORUST
Pintadas de grafitis	GRAFITTI REMOVER	NOPAINT STAR
Spay acrílicos, alquídicos, y nitrosintéticos	GRAFITTI REMOVER / KIT SILI-GONE	
Verdín, algas, musgos, líquenes	DEEP DEGREASER / COLOURED STAIN REMOVER	ALGACID
Ennegrecidos exteriores		
Residuos de silicona y pegamentos	KIT SILI-GONE	ZERO SIL
Residuos espuma y poliuretano	EPOXY CLEANER	
Residuos cinta adhesiva, cercos de ventosas	SOLVENT STRIPPER	
Cera de vela, resina de árboles	DEEP DEGREASER	
Suciedad en la junta	GROUT CLEANER	FUGANET

Cleaning

INSTANT REMOVAL OF FRESH GROUT RESIDUES

Once tiles have been grouted and given an initial clean with a moist sponge, it is possible to leave the surface absolutely spotless, with no grout haze.

By using INSTANT REMOVER (for cement-based grout) or EPOXY PRO (for epoxy grout) by FILA, pristine surfaces that comply with the UNE 138002:2017 standard can be achieved, the same day that they are grouted.

Both INSTANT solutions are fast and foam-free, they don't need rinsing, and they don't discolour the joints.

They are very simple to use. Once the tiles have been grouted and given an initial clean with a moist sponge, spray INSTANT REMOVER (or EXPOXY PRO in the case of epoxy joints) onto the tiled surface and leave it to act for 1 to 2 minutes. Then wipe the surface with a moist sponge or soft cloth.

CLEANING NEWLY-LAID TILED SURFACES

After walls or floors have been tiled, it is important to give the surface a thorough clean to remove grout residues and building dirt. A slightly acidic product, such as FILA DETERDEK PRO or FABER CEMENT REMOVER, should be used which does not release toxic fumes, harm users, or damage the tiles or tile joints. In the case of tiles laid with an epoxy or resinous grout, the surface should be cleaned with a detergent specially for epoxy materials, such as FILA CR10 or FABER EPOXY CLEANER.

EVERYDAY CARE

Ordinary Cleaning:

To clean the floor well, use a neutral detergent with a strong cleaning power, like FILA CLEANER PRO or FABER FLOOR CLEANER or SAN-X FLOOR, which is able to remove layers of organic dirt without leaving a cloudy film.

Extraordinary Cleaning:

To remove strongly incrusted layers of organic dirt, FILA PS87 PRO or FABER TILE CLEANER or DEEP DEGREASER (Polished floors) cleaner should be used to give the surface a thorough clean.

Dilute one part of the product in up to 10 parts of water, depending on how dirty the surface is, and leave it to act for 5 minutes. Then rub the patches of dirt with a brush, remove any dirt residues (preferably with a vacuum cleaner for liquids), and rinse the surface with plenty of water.

There are many other types of incrusted dirt. The following table shows the right product by FILA for each kind of dirt.

TYPE OF INCRUSTED DIRT	PRODUCT BY FABER	PRODUCT BY FILA
Light organic everyday dirt	FLOOR CLEANER	CLEANER PRO
Heavy organic dirt	DEEP DEGREASER / TILE CLEANER	PS87 PRO
Fat, grease, oil, soft drinks,food and sauce	DEEP DEGREASER	
Rubber, tyres		
Ink, marker pen, plastic paint	DEEP DEGREASER/TILE CLEANER	
Detergent, soap or wax remains		
Epoxy grout residues	EPOXY CLEANER	CR10
Cementitious grout residues, saltpeter	CEMENT REMOVER	DETERDEK PRO-PHZERO
Limescale		
Metal scratches	TILE CLEANER GEL	
Rust	DETERDEK	DETERDEK-NORUST
Graffitti	GRAFITTI REMOVER	NOPAINT STAR
Acrylic, alkyd & nitrosynthetic spray paint	GRAFITTI REMOVER / KIT SILI-GONE	
Green plant stains, algae, moss, lichen	DEEP DEGREASER / COLOURED STAIN REMOVER	ALGACID
Outdoor black mould		
Silicon & glue residues	KIT SILI-GONE	ZERO SIL
Foam & polyurethane residues	EPOXY CLEANER	
Marks made by adhesive tape or suction cups	SOLVENT STRIPPER	
Candlewax, tree resin	DEEP DEGREASER	
Dirty tile joints	GROUT CLEANER	FUGANET

peronda

Las baldosas cerámicas una vez que llegan al final de su vida útil son un residuo inerte, que para su correcta gestión debe ser entregado a un gestor autorizado de residuos, favoreciendo su reciclado. Once ceramic tiles reach the end of their useful life, they are inert waste. For their proper management, they should be given to an authorized waste management body for recycling purposes.
